PROJECT EXPERIENCES

HitList – Casting & Talent Hiring Platform │ 4 Members   6 Months

Laravel , PHP, jQuery, HTML, CSS3

- Developed a web platform to facilitate hiring of Cast and Cast Managers for large-scale projects.
- Built both front-end and back-end panels using the Laravel framework.
- Enabled user functionalities such as sign-up, sign-in, portfolio creation, star ratings, likes, and dislikes.
- Designed role-based access control for administrators to manage all modules and user permissions.
- Implemented features for role creation, offer sending, and complete system management.

Blax Blax – Social Media API Admin Panel │ 2 Members   5 Months

Laravel APIs, PHP, jQuery, HTML, CSS3

- Developed an API-driven admin panel using Laravel for a Flutter-based social media app similar to Instagram.
- Supported key user features such as sign-up, login, media posting, friend requests, chat, and live streaming.
- Built secure and scalable RESTful APIs for seamless mobile app integration.
- Enabled admin capabilities to manage user accounts, posts, comments, and platform activity.

Eddbee – Stock & Share Market Simulation │ 4 Members   11 Months

Laravel, API Integration, PHP, jQuery, JavaScript, HTML, CSS

- Developed a full-featured web application for stock trading simulations, using Laravel for both front-end and admin panel.
- Enabled users to create portfolios, play stock-based games, and simulate buying/selling of shares.
- Integrated features for stock detail analysis, live pricing display, and wallet management.
- Built social engagement tools allowing users to invite friends and join games together.
- Empowered admin with tools to manage games, users, analytics, and system-wide configurations.

NSCC – Sports Ticket Booking │ 1 Member   3 Months

Laravel, PHP, jQuery, JavaScript, HTML5, CSS3, MySQL

- Developed a web portal to display sports event information and facilitate ticket booking via third-party integrations.
- Implemented features for viewing ticket booth numbers, event schedules, and detailed match info.
- Enabled users to browse player profiles and related media content (photos and videos).
- Added modules for violation reporting, general inquiries, contact forms, and media updates.
- Built a clean and responsive front-end to enhance user experience and navigation.

Echo Charlie – News & Article Publishing │ 1 Member   2 Months

Laravel, PHP, jQuery, JavaScript, AJAX, HTML5, CSS3, MySQL

- Developed a content-driven web application to publish both text and video-based articles across multiple categories.
- Implemented category-wise and author-based article filtering for efficient content discovery.
- Integrated social sharing options for Facebook and Instagram to boost content reach.
- Added customer subscription functionality for exclusive content access and updates.
- Designed a user-friendly interface for readers and content contributors alike.
